Editorial

Dear employers,

You may have heard of Emmanuel Macron, Jacques Chirac, François Mitterrand, Simone Veil, Boutros Boutros-Ghali, Jean-Claude Trichet, Chandrika Kumaratunga, Pascal Lamy, David de Rothschild, Marcel Proust or Christian Dior, just to name a few... did you know they were all Alumni of Sciences Po?

How well do you know Sciences Po? With a network of 470 partner universities around the world and some 30 dual degrees with prestigious universities such as Columbia University in New York, the London School of Economics and Peking University, Sciences Po is France's leading university in the social sciences and is ranked third in the world for politics and international studies in the QS rankings.*

Since 1872, Sciences Po has been educating decision-makers in the public and private sectors. Today, we have a student body of 14,000, half of whom are international students from more than 150 nationalities. Our network of 65,000 alumni carries significant clout in politics, international organisations, multinational corporations, academic research, the media and the arts.

Founded on the belief that humanities and social sciences are crucial tools for understanding and transforming the world, Sciences Po's educational approach combines a multidisciplinary academic foundation with professional skills, well-rounded knowledge and a spirit of action.

The Bachelor programme of our Undergraduate College gives students a choice of study at any of our seven regional campuses and covers the six core disciplines of law, economics, humanities, history, political science, and sociology. Students are encouraged to consider shifts in contemporary society at a local and global level, and to work towards the common good through a civic engagement project of their choice. At the end of these three initial years, graduates of the Bachelor degree are invited to further specialise with a Master's programme in public affairs, international affairs, law, business, urban studies, journalism, or research at one of our seven professionally-oriented graduate schools.

Our graduates are quickly operational and capable of taking positions of responsibility in a wide range of sectors and professions, thanks to the internships that form an integral part of programmes at every level and to the large number of courses taught by practitioners (business executives, civil servants from both France and abroad, specialists leading innovation in their field). Just one year after completing their course, 70% of our graduates go on to work in the private sector, 20% to the public sector, with 10% taking roles within international organisations.

We hope you enjoy learning more about our graduates.

Anne Lesegretain

Director of Sciences Po Careers

**According to the 2019 THE and QS World Rankings respectively*

Degrees and Careers

Sciences Po has been educating public and private sector decision-makers working in France and worldwide for almost 150 years.

From their first undergraduate year to completion of a Master's degree, 14,000 students of more than 150 nationalities acquire the fundamental knowledge and professional skills they will need to excel in senior positions in a constantly changing international environment. 70% of them will enter the private sector after graduation, 20% choose the public sector and 10% go on to work for international organisations.

Our graduates' outstanding analytical skills, intellectual agility and curiosity, writing skills and adaptability are highly valued by recruiters. 44% of our Master's students are recruited before they graduate.

Our degree programmes

Sciences Po offers programmes from Bachelor's to Doctorate level, divided into three main stages:

Undergraduate

The Undergraduate College

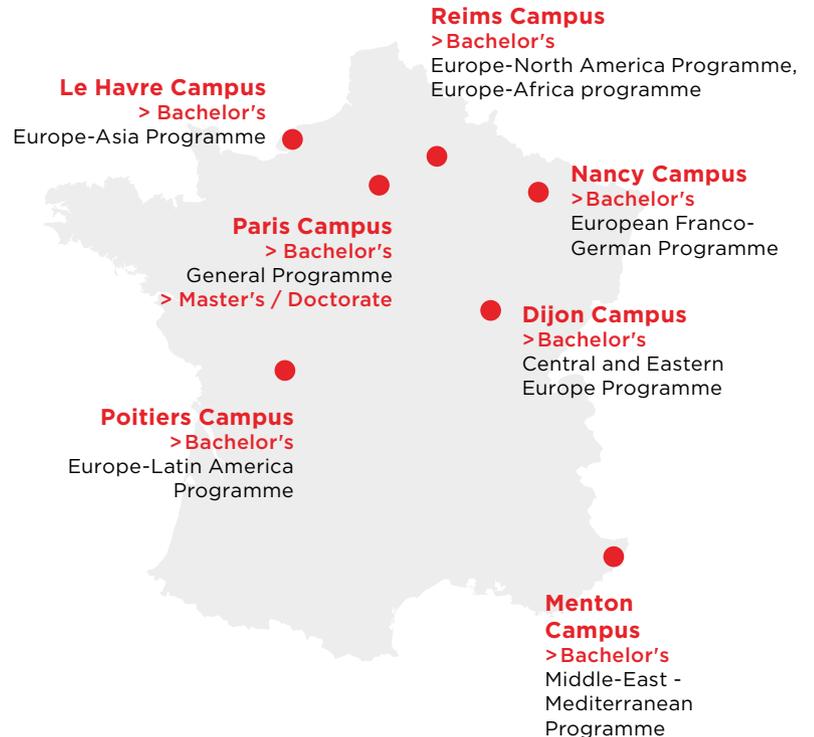

> Bachelor's programme in the humanities and social sciences

Over the course of three years at any one of our network of seven campuses, our 5,000 students learn the fundamentals of law, economics, history, political humanities, political science and sociology, complemented by courses in the arts and natural sciences.

They acquire a solid understanding of a range of global issues (democracy, inequality, peace, migration, environmental protection, food security, etc.) and explore political, social, economic and cultural issues from a regional perspective.

Civic engagement plays a central role in their studies, by means of internships completed in first and second year, and opportunities throughout the programme to participate in socially engaged societies and group projects.

OUR CAMPUSES

Graduate

Seven schools, over 35 Master's programmes

> Master's degree

Our master's programmes are delivered at seven graduate schools. Each school offers programmes that combine fundamental knowledge with practical experience targeting its specialty fields.

- School of Public Affairs
- Paris School of International Affairs (PSIA)
- Law School
- School of Journalism
- School of Management and Innovation
- Urban School
- Doctoral School

The seven schools also offer **one-year master's programmes** designed to enable young professionals to advance quickly or specialize in the early years of their career.

PhD

Doctoral School

> Doctorate, PhD

Students wishing to study for a **PhD** can join one of Sciences Po's five doctoral programmes in law, economics, history, political science and sociology, which draw on the research-based Master's programmes offered at the Doctoral School.

Sciences Po,
a university
committed
to educating
change
makers.

Young graduate employability

Every year, Sciences Po conducts a graduate employability survey to determine the professional situation of recent graduates 18 months after completing their degree. In our 2019 survey, 1,575 of the 2,391 graduates in the Class of 2016 responded to our questionnaire in full, representing a 66% response rate.

Seven graduate schools

Seven graduate schools prepare students to enter the professional world.

Each Sciences Po school has its own identity and range of programmes defined by its specialised professional focus. Master's programmes accept students from various backgrounds: Sciences Po bachelor's degrees, university degrees in the arts or sciences, engineering or architecture schools, business schools, French 'classes préparatoires', etc. For two years, our 6,000 Master's students are in constant contact with the realities and challenges of the professional world. The academic courses delivered by Sciences Po's faculty are complemented by specialised courses from recognised practitioners in their sector.

Pedagogical innovation is central to the schools' approach. Case studies, workshops, team projects and study trips are used extensively to ensure active learning. Optional and mandatory internships, gap year internships and apprenticeships play a key part in preparing students for working life.

School of Public Affairs

Yann Algan,
Dean of the School
of Public Affairs
Economics professor
at Sciences Po

The School of Public Affairs educates the next generation of policy-shapers committed to serving the common good. The young professionals that emerge are innovative and responsible, efficient and socially engaged. They take on roles that require a panoramic view of public affairs, whether in the public or the private sector, at a local, national, European or international level, and in any of a vast array of fields (public administration, consulting, the economy, security and defence, health, energy and sustainable development, culture, new technologies, digital innovation, the list goes on).

Law School

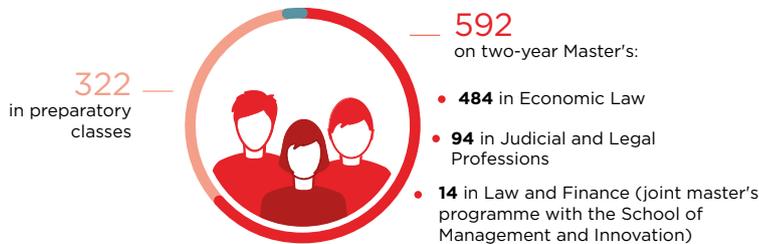

Christophe Jamin,
Dean of the Law
School, law professor

The Law School accepts students from diverse backgrounds with no prior legal studies required. They are trained for legal professions through a demanding interactive teaching method. Every year, our students successfully pass the Bar Exam and the Judiciary or Police Commissioner competitive recruitment exams. Some graduates go on to work in business or for regulatory authorities. Recruiters appreciate their analytical skills and capacity to propose original and rigorous solutions suited to a changing world.

Who are our 934 students?*

School of Management and Innovation

Marie Laure Djelic,
Doyenne

The School of Management and Innovation trains business professionals with the creativity and entrepreneurial vision needed to transform companies and rethink the role of business in society with a view to the common good.

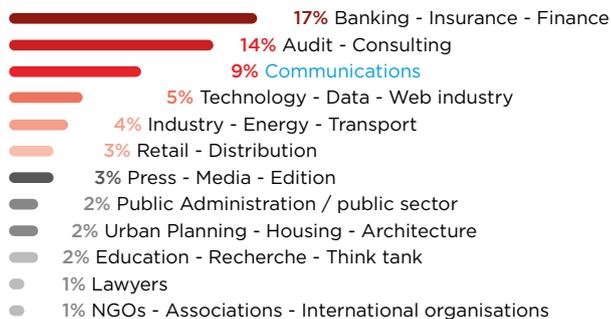

The traditional career prospects its programmes offer are varied: audit-consulting, banking-finance-insurance, marketing-communication and human resources. The school also fosters the placement of its graduates in new fields: the creative economy, the digital sector, entrepreneurship, new business models, responsible investment, risk management and governance, social reporting and environment.

Urban School

Patrick le Galès,
Dean of the Urban
School. CNRS
senior researcher

Start with the city, transform the world. This is the ambition at the heart of the Urban School, which trains public policy professionals specialising in territorial innovation and urban development. Our students come from varied academic backgrounds (social sciences, engineering, architecture, etc.) and receive advanced academic instruction in the governance of economic, social, ecological and democratic challenges. Professional skills are at the core of our courses, which are taught by many of the most innovative practitioners in their field. Students gain the opportunity of implementing these skills during field trips, team projects, and internships throughout their studies. Our graduates are as well-equipped for work in the private as the public or non-profit sectors, becoming innovators, strategists, designers, or managers.

Pierre François

Dean of the Doctoral School. Sociologist and CNRS senior researcher at CSO

Multidisciplinary and internationally-facing, the Doctoral School promotes research that responds to the greatest scientific, technological, environmental and social challenges facing contemporary society. Whatever our students' academic or professional plans, we equip them with the knowledge they need to access a wide range of positions in the public and private sector.

SciencesPo

CENTER FOR ENTREPREURSHIP

Training entrepreneurial professionals

All our students are trained in entrepreneurial skills, whether or not they intend to launch a startup. Sciences Po focuses particularly on building students' inventiveness, curiosity, agility, perseverance, boldness, and ability to self-teach. This set of soft skills is taught through numerous courses based on "learning by doing".

Each year, the entrepreneurs and coaches of the Centre for Entrepreneurship train 1,000 of our students in creativity, design thinking, the lean startup, pitching, business models, etc.

Students who have completed these courses are equipped to join startups as business developers or product managers, as well as large companies that launch internal projects in "startup mode".

Sciences Po internships

Our students' studies are punctuated by compulsory or optional internships, from their first year on the undergraduate programme right through to the awarding of their Master's degree.

Bachelor	Civic internship 1 st year	<ul style="list-style-type: none"> • Compulsory • 1 month full-time minimum • Between mid-May and the end of August 	Internship in the public interest promoting equality and solidarity. Missions must include contact with and services provided to a target group (reception, social assistance, facilitation, support, etc.)
	Open civic project internship 2 nd year	<ul style="list-style-type: none"> • Compulsory • Total duration of 75 hours minimum • All year, from the end of September to the end of April • 3-4 consecutive hours maximum per week 	Internship in which students actively participate in the design and/or implementation of a civic or community-service project (e.g., outreach, educational, prevention or awareness-raising activities).
	Internship abroad 3 rd year	<ul style="list-style-type: none"> • Optional Six months full-time during the third year of study, starting in January 	This internship allows students to discover new professional experiences that help guide their choice of Master's programme and career plan.
Master	Gap year internships between 3 rd and 4 th year or 4 th and 5 th year	<ul style="list-style-type: none"> • Optional • 2 internships of no more than 6 months 	The purpose of the internship must be linked to the student's career plan and academic courses.
	Compulsory final internship 5 th year M2	<ul style="list-style-type: none"> • Compulsory • During the off-campus semester of the Master's programme • 14 consecutive weeks minimum, 26 weeks maximum full time (see calendar) • In France or abroad 	
	Optional internships	<ul style="list-style-type: none"> • Possible during both years of the Master's programme. • Parameters defined according to student's study-level and programme 	Optional internships allow students to gain experience in new fields and professional activities, and refine their final internship goals and career plans.

Good to know

Before the internship starts

- Agree with the student as to what his or her tasks will involve and how the internship will be organised
- A contract or internship agreement must be signed before the student's mission begins.

Please note: for a Sciences Po internship agreement:

- You must sign five copies of the agreement
- Allow one week for obtaining Sciences Po's signature.

During the internship

For any questions during the internship, you can contact the person overseeing the internship at Sciences Po.

After the internship

Fill in and sign the student's internship evaluation form.

Apprenticeships at Sciences Po

Eight of Sciences Po's Master's programmes offer students the opportunity to undertake an apprenticeship during their second year.

An apprenticeship is a form of training in which the student spends one year alternating between work in a public or private organisation and attending academic courses delivered at Sciences Po.

The organisation signs a specific employment contract with the student and Sciences Po, and enables the student to alternate between their paid work and courses according to a schedule defined in the contract.

When recruiting an apprentice, the organisation appoints a supervisor responsible for supporting and training the student as they develop their practical skills.

For you, employers, an apprenticeship is a unique opportunity to attract future talent to your company, give students first-hand knowledge of your activities and benefit from the critical perspective and innovative solutions they can contribute.

Because students must regularly spend time at Sciences Po, apprenticeships cannot be undertaken in organisations located outside France.

Meet our students and young graduates

Throughout the year, you can conduct recruitment activities and communicate about your employer brand with our students and recent graduates.

Participate in information and recruitment fairs

- Sciences Po Careers Fair - End of Sept.
- Legal Careers Fair - January / February
- Consulting Careers Fair - February/March
- European Internships Fair (Brussels) - February/March
- Apprenticeship Fair - March
- Online International Internships/Job Fair
- Other thematic careers fairs: contact us for details

Advertise your news and recruitment events

- On the Sciences Po Careers website
- In our news section
- In our newsletter
- On our networks

Propose a team project

Do you need a fresh perspective on your business? Would you like to entrust an issue your organisation is facing to a group of three to five international students with complementary skills? The team project is an introductory project management module open to first-year Master's students at Sciences Po. Participating students work on the project under near-professional conditions over a long period (8 months), fostering their acquisition of the soft skills employers are looking for.

Organise Tailor-Made Recruitment Events

Present your internship or employment opportunities to students and recent graduates at Sciences Po or on your premises. We can offer tailor-made services (recruitment sessions, after work events, etc.), designed to meet your recruitment needs.

Participate in careers panels

Share your professional experience and advice with our students.

Examples of sector-specific themes: Web & tech, consulting, Social enterprise, European affairs, CSE and sustainable development...

Examples of region-specific themes: Africa, the US, China, Latin America...

Become a recruitment partner

Develop your employer reputation strategy at Sciences Po and gain exclusive opportunities to recruit the profiles your organisation needs.

Gain benefits throughout the year:

- Visibility for your company on the Sciences Po Careers website and social networks
- Articles on your recruitment policy, interviews with your employees, and testimonials from the Sciences Po graduates who work for you
- Preferential terms for participation in our careers fairs
- Invitations to panels round table discussions
- Tailor-made opportunities to target your desired audience: meetings, recruitment sessions, corporate presentations, case studies, after-work events...

Our recruitment partners include

Arkema, BNP Paribas, Chanel, CMA CGM, Groupe ADP, Hermès, L’Oreal, LVMH, PwC, Sopra Steria, Schneider Electric, Ubisoft...

Sciences Po Partner Companies Provide Invaluable Support

Sciences Po has forged special relationships with around a hundred French and international companies, who support the university’s development and without whom many of our innovations in teaching and research could not have been realised

These partnerships are formalised by a donor or sponsorship agreement* and are accompanied by a financial commitment.

This collaboration can take various forms, including:

- Partnerships designed to strengthen an employer’s reputation among students and promote its recruitment opportunities
- Support for Sciences Po’s research activities (research chairs, programmes) in areas of interest to a company
- Championing social responsibility: support for initiatives promoting the diversity of the student body beyond geographical, financial or physical barriers, particularly our equal opportunities programme and support system for students with a disability
- Contribution to needs-based and academic excellence scholarships
- Partnership with a relevant school or campus

**with the possibility of tax deductions*

Career launch for students with disabilities

Companies that would like to hire staff with disabilities sometimes have trouble finding sufficiently qualified candidates. Since 2001, Sciences Po has pursued an ambitious equal opportunity policy that has enabled nearly 300 talented students with disabilities to get a quality education and fully develop their potential and professional skills.

The Sciences Po Accessible programme

This programme ensures that students with disabilities benefit from an accessible environment and tailored support throughout their studies, from the Sciences Po entrance exam until they begin working life.

In terms of career guidance and preparation, they have access to the following services throughout the year:

- > **Internship and job listings**
- > **Support** at the Sciences Po Careers Fair
- > **Introductions to companies** at the Sciences Po Accessible Fair
- > **Mentoring**: a scheme that puts the student in touch with an experienced professional who will help them develop their academic, personal and professional goals.

Support the Sciences Po Accessible programme

21 committed, responsible companies support Sciences Po's efforts in favour of social responsibility by contributing to the Sciences Po Accessible programme.

As partners, these companies benefit from:

- **a stronger image** among students as a responsible employer
- **special contact with students** to discuss internships and job openings (e.g. participation in the Sciences Po Accessible Fair)
- **their booth at the Sciences Po Business Fair made accessible** free of charge
- **exchange of best practices** with other partners
- **actions that count** towards meeting their obligations concerning the employment of workers with disabilities (OETH)

Companies that support Sciences Po Accessible:

Accenture, AFD, BNP Paribas, Cardif, Canal+, Capgemini Invent, EY, GE Healthcare, Groupe Casino, Handiem, HSBC, La Banque Postale, L'Oréal, Mercialis, Monoprix, Natixis, Ostrum Asset Management, Publicis, Schneider Electric, Société Générale, Total.
